• Profile

I build web apps, AI agents and internal tools, and automate company processes. AI gives me speed, versatility and more control. I set the direction: what gets built, for whom and why.

I started in 2015 with an agency internship, moved through graphic design and print, and since 2017 I've been building custom websites, online stores, apps and internal tools. Today I work AI-first. I write code with Claude Code and Codex, and on every project I first ask what it should bring to users and the business. What I don't know yet, I learn fast. And when a process hurts, the right tool usually fixes it. Sometimes the process just needs to be simpler.

• Experience

- | | |
|----------------|---|
| 2018 - present | Denva , AI engineer & full-stack developer
Under the Denva name I work directly with clients. I build AI agents, automations and custom MCP servers, plus websites, online stores and apps from first sketch to production. |
| 2017 - present | Vibration s.r.o. , Web developer
I build and maintain WordPress, from large multisite installs to WooCommerce stores. Alongside that I build store frontends on the Sellio e-commerce platform (PHP Yii, Vue.js). |
| 2021 - 2025 | TENENET o.z. , Web developer & IT specialist
Four years remote for a non-profit: sites for its projects, the main website and IT support for colleagues. |
| 2016 - 2017 | Multimedia s.r.o. , Graphic designer & press operator
I designed graphics for print and web and ran the printing presses. That's where my eye for type and detail comes from. |
| 2015 - 2016 | Comsultia s.r.o. , Web developer intern
HTML, CSS and JavaScript for agency projects. My first sites went live here, and that's where I got hooked. |

• How I work with AI

AI writes, I **decide**.

I hand agents the work they do faster than I do: code, tests, research and repetitive tasks. I decide what the product should do, how to build it and whether it's worth building. I always review the result myself.

Claude Code & Codex

My main development environment. Agents write and test the code; I set the direction and guard the quality.

MCP servers

Custom servers and clients that let AI work safely with WordPress, data and company tools.

Agents

I build single-purpose agents on the Claude Agent SDK, OpenAI Agents SDK and LangGraph, and combine them into teams that hand work off to each other.

Automation

Make, n8n, Zapier, webhooks and APIs. First I map the process and cut the unnecessary steps. Only then do I automate it.
