• Profile

I don't see a problem as an obstacle but as a chance to make something better. First I make sure I understand it, then I design and build the right solution, whether that's a web app, an AI agent or an internal tool.

I started in 2015 with an agency internship, moved through graphic design and print, and since 2017 I've been building custom websites, online stores, apps and internal tools. Today I work AI-first: AI gives me speed, versatility and more control; I set the direction. I write code with Claude Code and Codex, and on every project I first ask what it should bring to users and the business. What I don't know yet, I learn fast. And sometimes the best solution is to simplify the process, not automate it.

• Experience

- | | |
|----------------|---|
| 2026 - present | GrandPano , WordPress specialist
I build websites for residential development projects from scratch, 1:1 from Figma. I connect them to Realpad (price lists and leads) and tune SEO, visibility in AI search and performance. |
| 2018 - present | Denva , AI engineer & full-stack developer
Under the Denva name I work directly with clients. I build AI agents, automations and custom MCP servers, plus websites, online stores and apps from first sketch to production. |
| 2017 - present | Vibration s.r.o. , Web developer
I build and maintain WordPress, from large multisite installs to WooCommerce stores. Alongside that I build store frontends on the Sellio e-commerce platform (PHP Yii, Vue.js). |
| 2021 - 2025 | TENENET o.z. , Web developer & IT specialist
Four years remote for a non-profit: sites for its projects, the main website and IT support for colleagues. |
| 2016 - 2017 | Multimedia s.r.o. , Graphic designer & press operator
I designed graphics for print and web and ran the printing presses. That's where my eye for type and detail comes from. |
| 2015 - 2016 | Comsultia s.r.o. , Web developer intern
HTML, CSS and JavaScript for agency projects. My first sites went live here, and that's where I got hooked. |

• How I work with AI	AI writes, I decide .	
	I hand agents the work they do faster than I do: code, tests, research and repetitive tasks. I decide what the product should do, how to build it and whether it's worth building. I always review the result myself.	
	Claude Code & Codex My main development environment. Agents write and test the code; I set the direction and guard the quality.	Agents I build single-purpose agents on the Claude Agent SDK, OpenAI Agents SDK and LangGraph, and combine them into teams that hand work off to each other.
	MCP servers Custom servers and clients that let AI work safely with WordPress, data and company tools.	Automation Make, n8n, Zapier, webhooks and APIs. First I map the process and cut the unnecessary steps. Only then do I automate it.
• Skills	AI & agents	Claude Code, Codex, Claude Agent SDK, OpenAI Agents SDK, LangGraph, Multi-agent orchestration, MCP servers & clients, Tool calling, Prompt & context engineering
	LLMs & data	OpenAI API, Anthropic API, Gemini API, Local models (Ollama), RAG, Embeddings, pgvector, Structured outputs, LLM evals, AI image & video generation
	Automation	Process mapping, n8n, Make, Zapier, Webhooks & APIs, Cron
	Frontend	React, Next.js, TypeScript, Vue.js, JavaScript ES6+, Three.js, GSAP, Lenis, SCSS / BEM, Vite, webpack
	Backend	PHP, Python, Node.js, Hono, WordPress, WooCommerce, ACF Pro, WP REST API, WP-CLI, Yii, MySQL, PostgreSQL, SQLite
	Infra & quality	Cloudflare Workers, Cloudflare D1, Docker, Git, GitHub Actions, GitLab CI, Caddy, Traefik, Vitest, Playwright, PHPStan, ESLint, Stylelint, Prettier, CodeRabbit, MainWP, Restic, GlitchTip, Uptime Kuma
• Languages	Slovak (native), English (professional working proficiency)	
• Education	Secondary School of Printing, digital media graphic designer (2012 - 2016)	
• Projects	Denva Second Brain Private project A private AI brain: RAG on pgvector, an MCP server, a Telegram bot and a coding agent	Národný futbalový štadión narodnyfutbalovystadion.sk Bilingual stadium website with automatic event import from Ticketportal
	Brixx brixx.cz Residential development site with a live flat price list synced from Realpad	Pangeas pangeas.cz Czech slow fashion marketplace on WooCommerce and Dokan with shipping and contracts per vendor
	Routie routie.sk Own e-shop: a live map preview and a personalised print from an uploaded GPX route	Monkey Studios monkeystudios.com Four-language site with a 106-frame scroll-driven hero sequence and custom GSAP effects

Rkovacovsky Photo

rkovacovsky.sk

Photographer's portfolio with a self-drawing signature intro and a custom GSAP lightbox

Cherries

cherries.sk

Nail studio site selling gift vouchers through Stripe, with a colour configurator

LEDpixel

ledpixel.sk

LED wall rental site built 1:1 from Figma, with the match checked by automated measuring

Jaroslav Košťial

jaroslavkostial.sk

One-page campaign site with solutions in dialogs and suggestions per locality

Auto Omnium

autoomnium.sk

Three-language BMW dealer site with AI translation of vehicles through OpenAI and CZK prices from the ECB rate

AK Baltazarovič

akbaltazarovic.eu

Law firm site moved from static HTML to WordPress with a 1:1 visual match

School of Arts

schoolofarts.sk

Art school site with courses, tutors and a promo system

Denva

denva.studio

Four-language site with an automated blog and international SEO

Zanzara

zanzara.cz

Residential development site with scroll-driven video and a live price list from Realpad

Nová Trnitá

novatrnitá.cz

New city district site with a newsletter connected to Realpad and its own llms.txt

Juraj Mikúš

jurajmikus.sk

Campaign site for a Skalica mayoral candidate with EU 2024/900 transparency notices

Dermateq

dermateq.sk

36 ACF blocks, a custom content model for technologies and results, critical CSS per template

Saunika

saunika.sk

WooCommerce store with a custom theme from the client's design

A-Studio

adrianastudio.sk

Interior design studio site with references, smooth animation and a custom gallery

Nora Horváthová

norahorvathova.sk

Campaign site with anonymous suggestions and print materials generated from code
